Baby’s 1st Straw Cup
ASSEMBLY & USE

Assemble both straw pieces firmly together.

Pull through lid until straw snaps into place.

rubber collar is visible when straw is snapped in place

If using separate handles, assemble with cap before tightening onto cup - connect notches in handles with structure under cap. Fill cup and tightly screw cap, with or without handles, onto cup.

CLEANING
Before using, wash in hot soapy water & rinse well – if possible, wash in dishwasher for best results. Wash cup immediately after every use. Avoid overly aggressive cleaning of any parts to prevent damage to sealing surfaces. Do not boil or microwave to sterilize parts. All parts are dishwasher safe, top rack only.

For Your Child’s Safety and Health

WARNING!
Always use this product with adult supervision. Continuous and prolonged sucking of fluids will cause tooth decay. Always check food temperature before feeding. Hot or carbonated liquids are not recommended. Due to the risk of hotspots and over-heating, use of a microwave oven is not recommended. Always use transition cup with valve installed. The transition cup will not function properly without it. The spout must be clean and free of obstructions. Keep all components not in use out of the reach of children. Before each use, inspect all components for wear or damage. To prevent a possible choking hazard, test the strength of the valve and straw regularly by pulling hard and checking for cracks or wear. If any component becomes cracked, torn or shows other signs of excessive wear, discontinue use immediately and discard worn or damaged parts. Always use with adult supervision and do not leave child unattended with the cup. Do not allow a child to walk or run while using the cup. Do not leave the product in direct sunlight or heat, store in a dry environment. Straws are not suitable for a child under 6 months.
