Exposure controls

Ventilation and engineering measures

: This is a personal care product that is safe for all users under normal and reasonably unforeseen use. Provide adequate ventilation. General room ventilation is normally adequate. Where adequate general ventilation is unavailable, use local exhaust ventilation, or other engineering controls.

Respiratory protection

: This is a personal care product that is safe for all users under normal and reasonably unforeseen use. If airborne concentrations are above the permissible exposure limits or are not known, respiratory protection may be required. The filter class for the respirator must be suitable for the maximum expected contaminant concentration (gas/vapour/aerosol/particulates) that may arise when handling the product. If this concentration is exceeded, self-contained breathing apparatus must be used. Advice should be sought from respiratory protection specialists.
